

TASK - 1: Using `math.ceil(a)`

Objective: Write a program that demonstrates the use of `math.ceil(a)` to print the next highest integer.

- **Import the Math Library:**
 - Import the `math` library.
- **Use `math.ceil()` Function:**
 - Use the `math.ceil()` function to find the next highest integer of a given float (e.g., `4.2`).
- **Print the Result:**
 - Print the result of the `math.ceil()` function.
- **Sample input:**

4.9

- **Sample Output:**

5

- **Explanation:**
 - The ceiling of 4.9 is 5.
